

Cibēs

Bringing People **TOGETHER**
Cibes New Generation Home Lift

MEET OUR DESIGNERS

Our industrial designers Ida Eriksson and Gustav Berg have been working closely with the R&D Department to create a new and innovative home lift design. "Our role as designers is to build a bridge between engineering and usability, creating beautiful and sustainable lifts with an intuitive design." *Ida & Gustav*

Cibes Challenger has a timeless and intuitive design, offering you an even greater choice of colours and materials to blend in perfectly with the unique style and character of your home.

Silent, Energy-efficient EcoSilent

We want you to be able to enjoy the comfort of your lift, day and night, without ever waking your family. To offer you and your loved ones a smooth and quiet ride, we took inspiration from the serenity of Swedish nature. The result is virtually soundless.

Lifting screw

The lifting screw has a 3 x higher pitch (36 mm) and the new screw joints are so smooth that you hardly notice them during lift travel.

Guiderail Joints

Design upgrade, they eliminate the vibration from guiderail connection during lift travel.

Guide rollers

The guide rollers reduce the frictional force by 90% and need no lubrication, which facilitates maintenance.

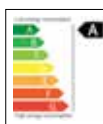

SilentBox

The drive unit is enclosed in an elegant soundproof metal casing, designed to cover up the drive unit and to eliminate high-frequency noise.

Drive unit

The new drive unit has been completely redesigned for silent and energy-efficient operation.

A lift equipped with our innovative drive system carries Energy Label A and uses 45% less energy than a lift without. Yearly energy consumption based on a 2 stop lift with 3.6 m travel, equipped with EcoSilent and a frequency of use of 20 travels/day. Energy classification according to VDI 4707 Part 1: 2009. Tests conducted by Liftinstituut B.V. www.liftinstituut.com. Decibels measured 2 m from the lift, at constant speed and with a 150 kg load. All tests conducted by Springwell Audio AB, member of the Swedish Acoustical Society, www.springwellaudio.se.

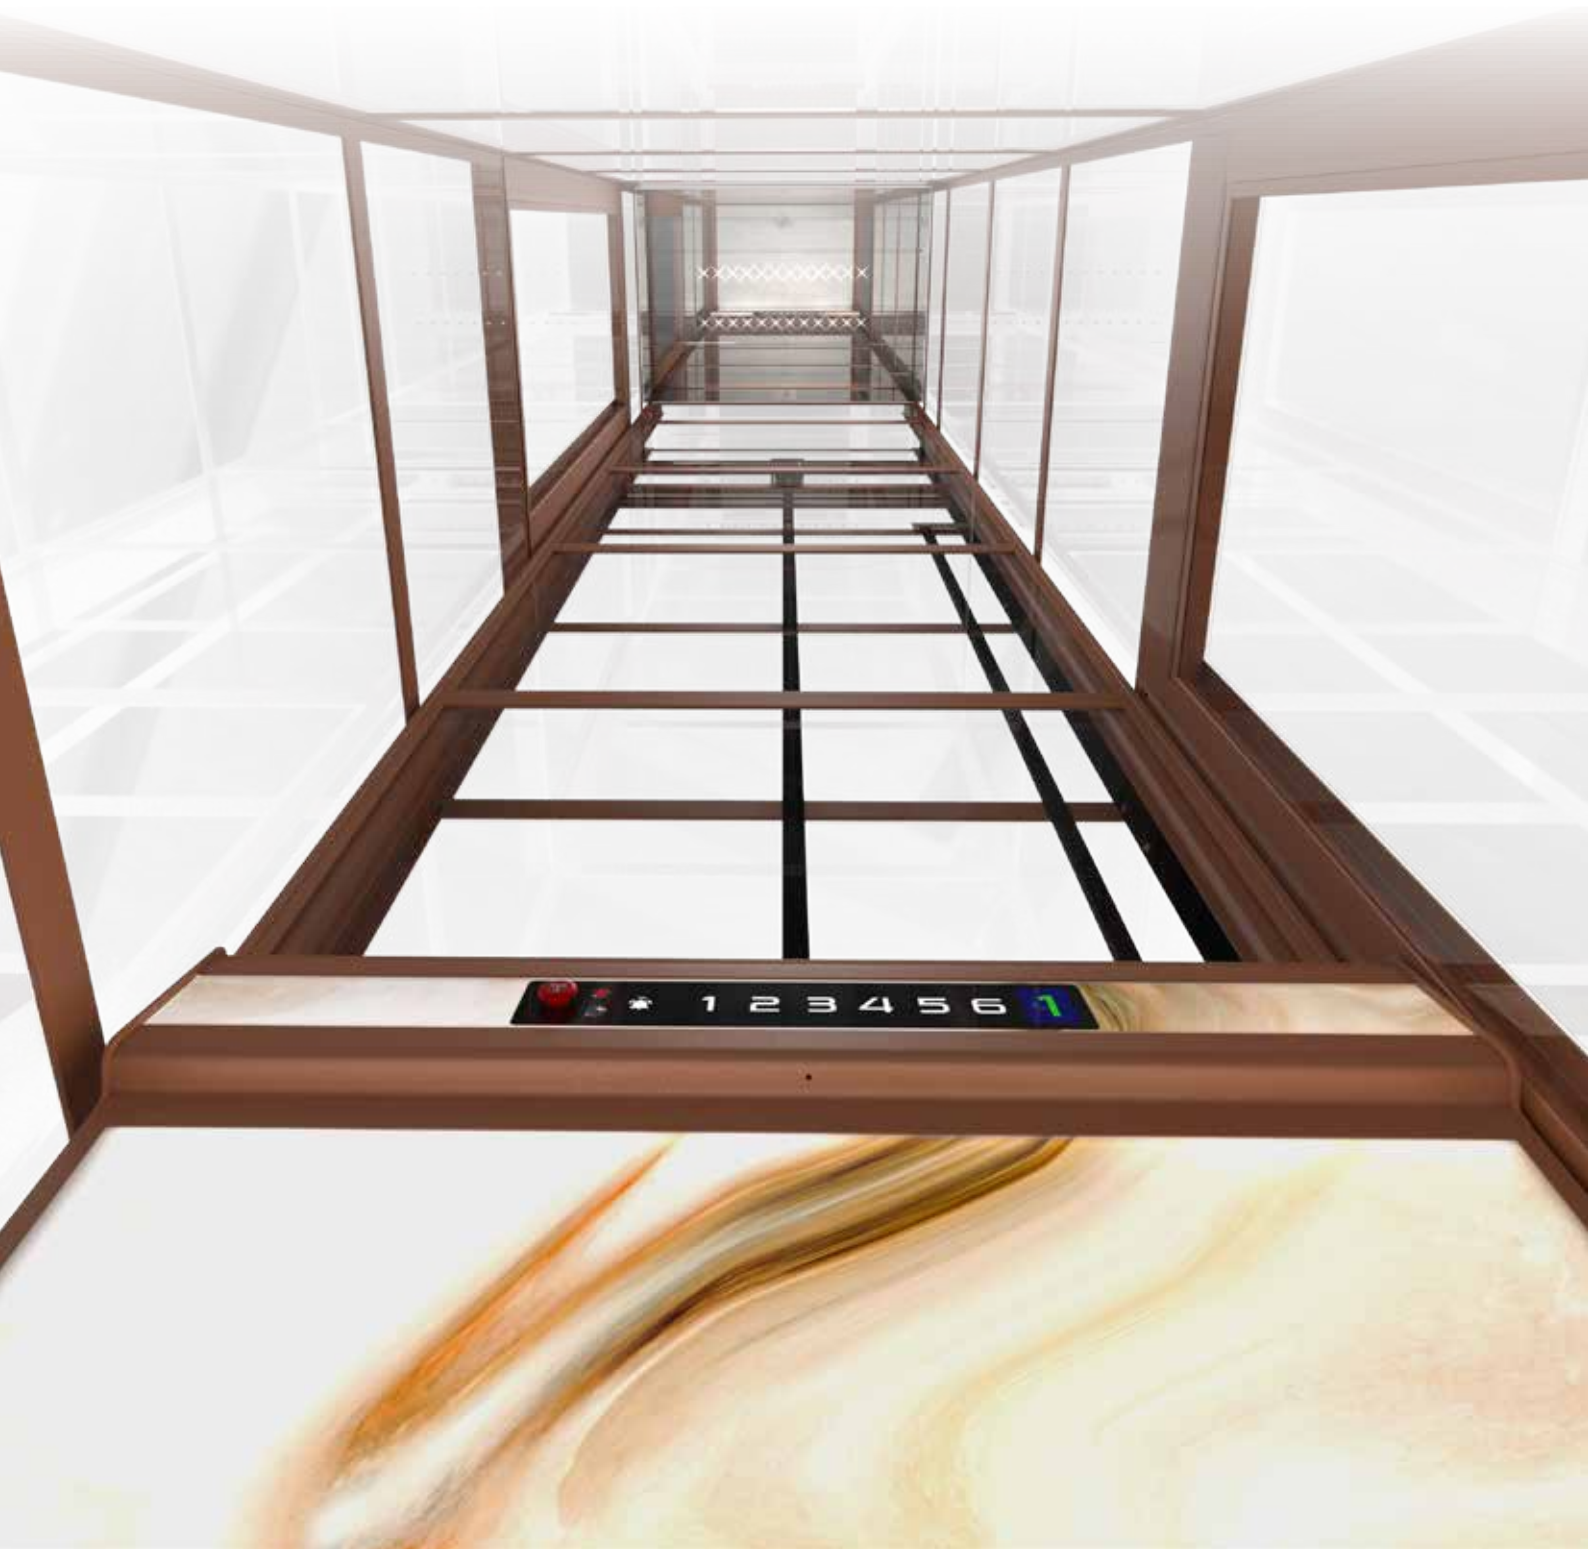

GENERATION SHAFT

FIVE SURFACE PANORAMIC GLASS

The Cibes Voyager comes with a brand new shaft, designed to showcase your home.

The four-side panoramic glass shaft has always been one of the advantages of CIBES. Our new product, has in addition to the four-sided glass shaft also a mirror ceiling effect, which gives a 5 sides glass experience, increasing the sense of space permeability.

Our most luxurious shaft yet

CONTROL PANEL

ALL NEW TOUCH SCREEN

The Cibes Voyager comes with brand new state-of-the-art touch screen.

modern touch screen control from the call button to the operating platform, making the operation more convenient.

Premium Series has standard Lift Status Indicator

- › **CONTROL PANEL WITH LARGE, EASY TO READ NO.**
- › **LIGHT, SOUND AND FEEL OF THE INTERFACE!**

Premium Series comes standard with touch panel with both visual and feel (vibration) indicators when calling the lift.

› **MECHANICAL BUTTON**

› **TOUCHSCREEN BUTTON**

Featherly

Light Touch

SPACE-SAVING LIFT SOLUTIONS

Cibes home lifts are machine room less, compact lift solutions, which have a low pit and top height compared to conventional lifts.

CIBES CHALLENGER

LIFT SOLUTIONS FOR EVERY BUILDING

Top safety edge

Emergency stop & alarm

Lift display

DecoLegno®

Ergonomic handrail

Innovative safety functions

While most platform lifts have large and industrial-looking buttons for the emergency stop and lift alarm, the innovative design of the Cibes Challenger incorporates these essential safety functions much more elegantly, in two flush mounted buttons placed at the top of the platform back panel.

Ergonomic handrail

The handrail of the Cibes Challenger has a unique, intuitive design. You simply put your hand on the destination button to travel, and relieve the pressure to stop. This ingenious design makes use of your natural instinct to lean on the handrail, offering you and your loved ones effortless travel.

CHALLENGER WOOD

Wooden materials infuse the room with natural harmony and few things are as soothing to the mind and soul as the sensation of silky wood against your palm.

Backpanel of platform available in:

- Beautiful blonde oak
- Honey coloured bamboo

Light oak

Blonde bamboo

CHALLENGER TEXTILE

Natural fabrics like linen and wool never go out of style. Linen adds cool sophistication to the room, while the rich texture of wool has warm and welcoming feel.

Backpanel of platform available in:

- Light grey wool
- Light blue linen

Light blue linen

Grey wool

CHALLENGE METAL

Classic, hard-wearing metals like steel and aluminium, blend in seamlessly with a wide range of decorative styles, whether minimalist, eclectic or traditional.

Backpanel of platform available in:

- The RAL colour of your choice
- Cibes Colour Selection

Safety edges

The top safety edge is located behind the upper bar of the back panel and it will stop the lift instantly when touched.

The safety edges framing the platform floor, stop the lift at the slightest touch. Available in any RAL or premium colour as an option, and possible to equip with programmable LED light, the floor safety edges constitute an important part of the overall lift design.

Safety edge with LED lights

Standard safety edge

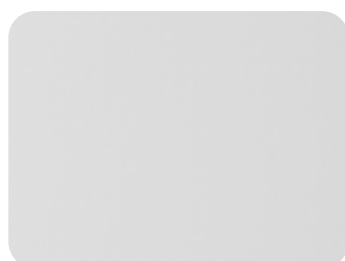

Lift display

The lift display includes a 7" screen with a large floor indicator. The display is covered with semi transparent mirror glass to create an elegant and futuristic look.

DecoLegno®

This unique material has a matte, velvety surface, which is soft to the touch. Easy to clean and resistant to scratches and finger prints, DecoLegno® is a very durable material. Available for the front panel of the platform in white, black or beige colour.

HM00 Piombo Total White

HM01 Piombo Beige

HM07 Piombo Nero

CREATE YOUR UNIQUE DESIGN

WOOD Enhance the beauty of your home by combining different colours and textures with your favorite grain of wood.

Shaft: Powder coated in RAL 5014, tinted glass
Back panel: Oak Front panel: Powder coated in RAL 5014 Handrail & top safety edge: Natural anodised aluminium Floor: Customised wood laminate floor.

Shaft: Powder coated in Alesta Amethyst 2, tinted glass Back panel: Bamboo Front panel: Black DecoLegno Piombo HM07 Handrail & top safety edge: Natural anodised aluminium Floor: Customised tiles.

Shaft: Powder coated in RAL 9016, clear glass Back panel: Oak Front panel: White DecoLegno Piombo HM00 Handrail & top safety edge: Powder coated in RAL 9016 Floor: Customised tiles.

TEXTILE Combine the rich textures of wool and linen with different colours to add softness and elegance to your interior design.

Shaft: Steel panels powder coated in RAL 1019 Back panel: Light blue linen Front panel: Powder coated in RAL 1019 Handrail & top safety edge: Natural anodised aluminium Floor: Customised wood laminate floor.

Shaft: Powder coated in Roman Gold, clear glass Back panel: Grey wool Front panel: Powder coated in Roman Gold Handrail & top safety edge: Natural anodised aluminium Floor: Standard floor Altro Contrax, black.

CIBES SWEDEN

+70 YEARS HISTORY

Cibes Lift Group is one of the world's largest manufacturers of low-speed lifts with headquarters in Sweden.

High-quality Swedish engineering and great design are the secrets behind our success. The factory in Sweden is located in Gävle, Sweden which has one of the top ten ports in Sweden. This helps our product to get exported more efficiently and conveniently.

The Swedish factory has a production area of more than 10,000 m² and is equipped with state-of-the-art machinery. Cibes has sold and installed more than 40,000 units in more than 50 countries, providing each user with the convenience of vertical travel.

CIBES THAILAND

We made a successful opening, as our clients are various and elite with high profile. We had Ajarn Chakrabhand Posayakrit; Thailand National Artist nominated Year 2000

Our Cibes lifts firstly debuted to Thailand market since 2011 via local distributor. However, as Cibes was not the their focusing area, and after market research from our team from Sweden with potentiality, We decided to start our first direct branch of Cibes Lift Group. Here in 2016, despite challenges as a newcomer for platform lift with screw-driven technique.

In 2017, as private home clients were still focusing on wheelchair accessible lifts for their elders, the real estate project developers were following closely this trend of luxurious house furnished with home lift.

In 2018, equipped with product background, installation profile and reference among real estate circles, Cibes TH role was getting strengthened constantly, that we have been frequently receiving contacts with interest from other clients with requirement of platform lift as commercial use.

Currently, Cibes Lift reputation in Thailand is getting stronger, not only by verbal reference from friends to friends, but also among developer/cooperate references.
